Customer Reviews

Dr. Lonny Shavelson offers a powerful, wonderful, and rareinsight into the medicalization of death in America. Hechronicles several terminally ill individuals and their attempts to die with dignity. I couldn't put the book down. Courbet Anderson, Gerontologist

The author is a physician who followed several cases of dying persons who from the onset of their terminal illnesses expressed a desire to commit suicide towards the end. Dr. Shavelson tracked these cases over 3-4 years and records the medical and emotional roller-coaster the patients went through. The best examination on a personal basis of assisted suicide so far published.

This is one of the finest books in this genre. Stories about real people and the caring doctor who befriended them, tended them and saw to their final wishes. Highly recommended!Betsy S.
