Synopsis

In this two-sided laminated QuickSheet, Elizabeth Mills offers the bare-naked essentials of citing sources for everything from books and articles to manuscripts and websites. Showing how easy (and necessary) it is to cite your sources accurately, she provides a template that can be applied by anyone using almost any type of source material. In a single chart containing ten main entries, she actually creates a comprehensive--if bare-boned--guide to citing sources. On top of that she offers a unique form to fill out--a source-data collection form for use at point of contact with each source. Starting with a column containing the basic elements from author/creator to manuscript and microfilm, the form provides space for notes for each specific source, so that each source consulted can be unmistakably identified, answering the basic who, what, where, and when type of questions as quickly and easily as possible. For a quick overview of the methods of citing sources, this QuickSheet is indispensable and easily lives up to its famous name.

Customer Reviews

Gave me a quick, concise view of what I need for each source. Can take it with me to the library, courthouse, or wherever I am doing research to help me get the information needed so the source can be found again later.

Poorly laminated. At \$6.55 for ONE PIECE of paper, the lamination should be done properly. Would not buy again.

Pricey but an excellent tool.

Nice shortcuts

This is an excellent outline on what is needed in citing sources. On the back is a form that can be copied and used when obtaining multiple sources. This quicksheet has been laminated for protection.

I probably should have simply bought the book, but this guide has been useful when I've made presentations about how to cite sources.

Can't go wrong using the quick guides from E.S. Mills. Highly recommend for all researchers.
